Determine the version of MacOS you are currently running on your computer

This will help guide you in selecting the proper download from the Student Computer Support (SCS) Team web site (<https://sites.imsa.edu/scs>).

- If you have not already done so, login to your Macintosh computer with a user that has administrative rights on the computer
- Click on the Apple icon in the upper left hand corner of the Finder menu bar.

- Click About This Mac

- Note the version of MacOS you have installed, this will determine which installation file you will need to download. In the example below the computer is running 10.15.4

Downloading the proper installation file

- Go to <https://sites.imsa.edu/scs>
- Click on the download link for the version of MacOS you are running

Ralph A. Flickinger

- If you have MacOS 10.14 or less installed, it is recommended that you upgrade to 10.15.x. Otherwise click on the link for 10.14 or lower
- If you have MacOS 10.15 or more installed, click on the link for 10.15 or above
- In our example above we would click on the link for 10.15 or above
- Download the file to you Downloads folder on your Macintosh computer

Installing IMSA's release of Symantec Endpoint Protection Client

- Go to your downloads folder and open it so you can see the contents

- Find and double-click on the downloaded file for your version of MacOS, example:

- The zip file will be extracted and leave a folder called Symantec Endpoint Protection. Double-click on the folder to open it
- Double-click on the file called Symantec Endpoint Protection Installer
- You will see a warning concerning a restart of the computer will be required at the end of the installation process. Read the warning and click Continue

- You will then be presented with the license agreement, read it and then click Agree & Install

- You will be prompted for your Mac's administrative username and password, enter them and click Install Helper

- The installation will continue. The installation may take several minutes depending on the speed of your computer.
- Once the installation has complete, it will display a screen informing you and request you to click the Close & Restart Button. Click to Close & Restart button to complete the installation

Your Symantec Endpoint Protection installation is almost complete.

Restart your Mac to complete the installation.

Close & Restart

Once the computer reboots

- As long as you have an Internet connection the Symantec Endpoint Protection client will communicate with IMSA central server and keep your computer's virus protection up-to-date.
- You can now remove the installation files from your download folder
